CANDIDATES APPROVED TO SIT FOR YEAR 2008 PROFESSIONAL INTERVIEW

The following candidates have been approved to sit for the Professional Interview for 2008.

In accordance with Bylaws 3.7, the undermentioned names are published as having applied for membership of the Institution, subject to passing the year 2008 Professional Interview.

If any Corporate Member of the Institution has any reason as to why any of the candidates is not a fit and proper person for election, he should communicate in writing to the Hon. Secretary. Such communication should be lodged a month from the date of publication.

Engr. Dr Jeffrey Chiang Choong Luin, MIEM, P.Eng.
Honorary Secretary, The Institution of Engineers, Malaysia

APPEAL FOR CONTRIBUTION

(To the IEM Building Fund)

Dear IEM Members,

It is reiterated that 24 November 2007 marked the beginning of another milestone in the history of IEM as we officially became the owner of a four and half storey building opposite the current Bangunan Ingenieur.

As already mentioned, the purchase of the building was primarily to cater for the expansion of IEM as we strive to provide more activities and service to our members. The building would ultimately become an engineering centre that would cater to all sorts of services to assist members in their business as well as career development. With IEM moving rapidly beyond Malaysian shores, it is the aim of the IEM Council that Malaysia would in the near future become the hub of engineering for the region and IEM would be the gateway for Malaysian engineers to achieve international recognition.

The current financial situation requires IEM to lease out part of the building whilst efforts are being through made a fund raising drive to reduce the borrowing and expedite repayment of the loan. This will allow members to use a bigger portion of the building and ultimately the whole building. Contributions received are also used to fund the refurbishment of the area to be used by IEM.

Generous contribution from IEM members as at May 2008 totalled RM413,286.00 while other private organisations have donated a total of RM328,502.00 bringing the sum received to RM741,788.00. We are still very far behind our target in order to settle the bank loan of RM12.15 million and an estimated RM1.0 million for refurbishment works.

However, we are very encouraged by the support shown to date and would like to record our sincere appreciation to members and private organisations who had contributed towards the fund. For members who have started contributing, please keep it coming and for those who have not, please start, it is better late than never.

Y. Bhg. Dato' Engr. Abu Hashim bin Abd. Ghani, FIEM, P.Eng.
Chairman
Ad Hoc Committee on Fund Raising

CONSTRUCTION SPECIFICATIONS

Principles & Applications

by Hans W. Meier

Unlike any other book on the market, this book addresses specification writing as a process for managing professional risk, enhancing the value of an architect's or engineer's instruments of service, and increasing the economic performance of facilities in public and private sectors. This book will guide users through the creation and implementation of construction specifications and related construction administration documents, detailing the requirements for effective, successful specifications. Coverage includes topics never before explored in other specification-focused publications, such as standards of professional care, risk management, and liability reform for architects and engineers. It also includes the current formats from the Construction Specifications Institute (CSI): *MasterFormat™* 2004 Edition, *SectionFormat,* and *UniFormat*. Given the growing complexity of the construction industry, the demand for specifications that can serve as management assets and risk prevention resources is at an all-time high, and professionals equipped with the knowledge this book provides will be best prepared to face these new challenges.

A WRITER'S HANDBOOK FOR ENGINEERS

by David A. McMurrey & Joanne Buckley

This handbook is for people in engineering programs in colleges and universities as well as for practicing engineers who must develop writing projects such as those listed in the following sections of this preface. You'll find a wide range of writing projects and writing-project development tools in this handbook. You'll also find examples from a wide range of engineering fields and disciplines.

How Writing and Engineering Relate and Connect

In their article "Beginnings and Endings: Key to Better Engineering Technical Writing," Marcia Martens Pierson and Bion L. Pierson cite a survey that found that practicing aerospace engineers and scientists spend on average between 19.6 and 23.3 hours per week writing documents. Even so, they point out that "engineers as a group dread writing." That's unfortunate because, as the examples included in this handbook show, the field of engineering possesses a wonderful, fascinating array of things to write about. And to the question posed in the title of her article "Can Engineers Write?' Joan Knapp answers with a resounding "yes."
