ALLIED ENGINEERING CONSULTANCY SERVICES

SDN BHD (AE) is a local Consulting Engineering Firm majors in civil, mechanical, electrical and process engineering. Started in July 1980 as a Technical Division of Felda Construction Corporation which provides technical services to Felda, its subsidiaries and joint venture companies, AE is now fully operates as a registered consulting firm, beginning 1992.

PRACTICE PROFILE

The practice has always remained the same – to bring high standard of professional service to every project commissioned. Recognition of the need to adapt as opportunities arise has resulted in one of the firm's great strength – the ability to provide a multi-disciplinary service which enable the client to deal with one Consultant who handles the major part of the work.

FIELD OF ACTIVITIES

- Industrial Building and Complexes
- Low Rise building and complexes
- Roads and bridges
- Drainage works for housing scheme
- Domestic, industrial and irrigation water supply
- Effluent treatment
- Industrial Project (POM, KCP, Refinery & Bulking)
- Town planning and housing estate development
- Process Engineering

SCOPE OF SERVICES

- Conceptual plan
- Investigation and survey
- Liaison with Authorities
- Detail Engineering Design
- Planning and Scheduling
- Estimating and tendering
- Procurement
- Construction Management
- Inspection and commissioning
- Approval from Authorities

COMPANY PROFILE

We are mechanical and structural fabrication company established in June 1983 and we have progressed rapidly to become a major fabricator of pressure vessels, heat exchangers, custom made mechanical equipment, tanks & silos, structural steel work and other general fabrication work. We have achieved MS ISO 9001:2000 accreditation for all our fabrication work and we are the authorised user of ASME U & U2 Code Symbols for unfired pressure vessels. In the trading division we are the sole agent of Nikkiso Co. Ltd. Of Japan for the sale of Nikkiso Non Seal Pumps, Hi-Power Pumps, Metering Pumps. We also supply high pressure steam boilers from Germany and Biomass Thermal Oil Heaters from China. Our Ikatán Filter Press division has also supplied more than 200 filter presses to customers worldwide in the palm oil fractionation, kaolin, waste water and oleochemicals plants. Our latest contribution to energy conservation is the Flue Gas Heat Recovery Units for boilers and combustion units.

Our fabrication center is located on a 3.2 hectare site in IGB International Industrial Park, and we have a covered works space of 10,000m². The products that we fabricate are :

1. Carbon Steel and Stainless Steel Pressure Vessels and Heat Exchangers for palm oil refineries, oleochemicals, bio-diesel, chemical industries and oil & gas industries.
2. Custom made equipment for cement plants, power plants, mineral processing plants, chimneys, water treatment plants etc.
3. Stainless Steel modules for automobile painting booths.
4. Stainless Steel and Carbon Steel Storage Tanks to API Standard 650
5. Steel Structures fabrication for factories, high rise structures and pipe racks for oil & gas industries.
6. Carbon Steel fabrication for container port quay cranes.
7. Custom made filter presses up to 1.5m x 15m frame size for the palm oil fractionation and Kaolin processing plants.

SETECH ENGINEERING

SETECH ENGINEERING SDN BHD was incorporated in 1997 to focus on providing quality and sound engineering services in the field of wastewater treatment, specializing in sewage treatment technologies. The company is currently registered with Jabatan Perkhidmatan Pembetulan, Indah Water Konsortium, CIDB as well as PPK to provide technical assistance and support. We are also working in collaboration with the above mentioned to carry out research and development on sewage treatment plants to further enhance the quality of the treated effluent. The company has also diversified into machinery fabrication specifically sewage treatment plant equipment in order to fulfill the following objectives: -

- To obtain local design information and database.
- To increase and create more 'localised' products and technology rather than be fully dependent on foreign technology.
- To modify and improve the equipment in order to suit local environmental conditions and local human resources ability.
- To enhance local design databases which presently solely depends on overseas research and development information.
- To introduce Malaysian sewage technology into the global market specifically into the global market. Here at SeTech Engineering Sdn Bhd, we place great emphasis on being a reliable and dedicated contractor. Our staff is well experienced and shall perform to the highest standards expected of us by our Client.
