

# 2<sup>nd</sup> INTERNATIONAL JUNIOR CHEM-E CAR COMPETITION 2017

## 3-4 NOVEMBER 2017

### MINES International Exhibition & Convention Centre

The competition aims to challenge students of primary schools to design and construct a small-sized car that is fabricated from reusable/recyclable items such as ice-cream sticks, bottle caps and straws. This Chem-E car shall traverse into a goal post and/or hit bowling pins in the car performance challenges. In addition, the participants shall elucidate their design creativity and issues related to safety and environment via poster presentation.
