IEM Critical Cover Insurance Scheme designed for IEM members by ING Insurance Berhad has been established since 1 April 1999. The Scheme will pay upon diagnosis of any of the 36 Dread Diseases and will paid an amount equal to 100% of the sum insured in a direct, lump sum cash payment to the insured or your designated beneficiary.

3. IEM Professional Indemnity Insurance Scheme (IEM-PII):

IEM launched the 'Professional Indemnity Insurance (PII) Scheme for IEM Members' on 1 July 1997. IEM, with the assistance of AON Insurance Brokers (M) Sdn. Bhd., has continued the PII Scheme for the benefit of members. 'Professional negligence' is the failure of a professional to meet the standards of cares to be expected from the average competent and experienced practitioner in carrying out his duties, thus rendering the profession liable in law to a client or some other third party who suffers a loss due to the negligent acts, errors or omissions of the professional, albeit there must be actual loss and such loss has to be proven.

The PII is designed to respond to legal liabilities and the costs of defense rather than any moral liabilities or strictly commercial considerations. The PII indemnifies the insured in case of a loss which the policy has been made but he cannot recover more than the actual loss or for pure economic loss. An employer is liable for the negligent acts, errors or omissions of his employees and a principal for the negligence of his agents. Where two or more professionals come together in a partnership, all the partners are jointly and severally liable to others for the liabilities of the partnership. Although a body corporate has limited liabilities in contract, they should still carry PII coverage to safeguard their long term prospects and the goodwill earned, and to protect their director's liabilities in tort.

Members should take note that the extent, terms and conditions of PII insurance coverage offered by the insurers had gone through scrutiny and negotiations by the PII Committee for the Member's benefit. Each application for the IEM Scheme is considered on its merits by the insurers. The insurers are able to offer the PII coverage under the IEM Scheme at annual premiums that are considerably lower than corresponding PII coverage obtained in the open market. Members wishing to purchase PII under the IEM Scheme should contact the Secretariat for more details.

IEM In Brief

by **Engr. Prof. Dr Ruslan bin Hassan**, F.I.E.M., P. Eng.

THE story of The Institution of Engineers, Malaysia (IEM) begins with the nation's independence. The Institution, born exactly 20 months after Merdeka – on May 1, 1959 – has had a marked influence on the engineering profession in the country. It was conceived in February 1958 and by a group of 3 engineers, its first meeting on 3 April 1959 at Mansion House, 2nd Floor, High Street, Kuala Lumpur.

It has grown and matured with the nation and its people. It started out with only 39 members. Over the past five decades, its membership has increased to 25,000 today, making it the largest professional body in Malaysia.

From its very inception, the IEM has identified and addressed itself to the needs and requirements of the country.

IEM has been fortunate in having the blessings and full encouragement of successive governments in power. Our nation's founder father, YTM Tunku Abdul Rahman Putra Al-Haj, and another great Malaysian leader, Tun Abdul Razak, had given much help and encouragement to the Institution in its formative years. The Tunku graced IEM's inaugural dinner in 1960. His successor Tun Abdul Razak also took great interest in IEM. Our present YAB Prime Minister, Pak Lah, has also taken an interest in the Institution's development. The close rapport between the IEM and the government has been strengthened over the years.

OFFICE PREMISES

In the early days the Institution had no building of its own and squatted on borrowed premises.

In the first two years of its existence it operated from the homes of its office bearers. It acquired the Bangunan Ingenieur which was officially opened in April 2, 1977 helped boost its activities which include sports, seminars, field visits, talks and conferences and Wisma IEM in 2008 (see cover page).

PAST LEADERS

No history is complete without the people making it. Similarly, IEM has had numerous dedicated and selfless leaders and members who made many sacrifices to nurture and build up the Institution to what it is today – a proud symbol of all engineers in Malaysia.

In its 50 years of existence, IEM has had the services of Presidents. They represent various engineering disciplines.

The founder President was Tan Sri Engr. Yusoff bin Haji Ibrahim who served a four-year term from 1956 to 1962. He was succeeded by another able leader, Raja Tan Sri Engr. Zainal bin Raja Suleiman (1962-1964), who was then the General Manager of LLN.

Twenty-six other Presidents came after him and each in his own way left an indelible mark on the IEM and shaped its destiny. They were:

Engr. Thean Lip Thong (64-66) (deceased)

Tan Sri Datuk Engr. Prof. Chin Fung Kee (66-68) (deceased)

OBJECTIVES

IEM's objectives have been to promote the science of Engineering. Towards this end, it has organised various conferences both local and international, conducted numerous seminars, talks and forum on various engineering disciplines.

LOCAL AND INTERNATIONAL AFFILIATIONS AND RECOGNITION

Over the years, IEM has gained recognition not only locally but also internationally. Those who have past the professional interview since July 1968 is recognised as Corporate Members.

IEM is an active member of several International Engineering Organisations. They include the World Federation of Engineering Organisations (WFEO), Commonwealth Engineers Council (CEC), Federation of Engineering Institutions of Southeast Asia and the Pacific (FEISEAP), Association of Engineering Education of Southeast Asia (AESEEA) and Asean Federation of Engineering Organisations (AFEO). The Institution is also represented on various local committees and organizations.

INVOLVEMENT WITH LOCAL ISSUES

IEM has effectively given its views and suggestions on matters that affect the profession as well as the people. IEM has been very vocal in defending the rights of the local engineering fraternity.

IEM has always been very active namely in problems facing the profession. IEM is also slowly but effectively trying to unite all engineers under one banner so that they can work together for the betterment of the profession as well as the nation.

FUTURE ASPIRATIONS

It is IEM's fervent hope to see that engineers in the Malaysian society become leaders in their own chosen field as well as renowned, influential and highly respected group in society. This is, however, not the end of the IEM story. The story of IEM is still unfolding and will continue to be developed and told for many more years to come ■
