SYNOPSIS

People nowadays are handling with electrical and electronic products more than centuries ago. However today, the electrical and electronic products are more complicated with high technology and more functionality. Thus safety, efficiency and compatibility are important areas to be considered. From the point of view of the user, how to ensure this?

1. Standard: In this chapter, you will learn how the standard
2. is developed and who responsible for the development. Why so many standards to be used? What is the different between IEC, ISO, BS, EN, MS, ASTM etc?
3. Accreditation: How to ensure that the products that has been comply with certain standards, did really complied?
4. Product Certification Scheme: What is the scheme and what benefits to the user? National scheme or International scheme?
