SYNOPSIS

The BRT Sunway line is an initiative to provide an efficient transport system that can carry more people while using less space. It combines the convenient features of a light rail transit system with the usage of dedicated lanes, environmentally friendly buses as well as customer-friendly infrastructure. The result is a fast, cost effective and integrated transport solution in areas that are densely populated and in need of a reliable public transportation system.

In a Public-Private Partnership initiative, Prasarana Malaysia Berhad and Sunway Berhad built an elevated Bus Rapid Transit (BRT) system to serve Bandar Sunway and Subang Jaya hence, bringing a solution to the traffic congestion problem to the area.

This technical visit will provide an opportunity for the participants to learn more about the BRT system, its energy performance as well as the operation and maintenance of the system.

HIGHLIGHT: In conjunction with AFEO Energy Tour 2016, please be informed that there will be a technical visit to Malaysia Transformer Manufacturing Sdn Bhd (afternoon session) after the visit to the BRT Sunway.
Do register this separate technical visit with us if you are interested!
