

International Conference on Materials Technology and Energy

**20th – 21st of April 2017, Miri, Sarawak, Malaysia
Curtin University Sarawak**

The International Conference on Materials Technology and Energy is an international conference aims at bringing together academics and practitioners in the field of materials technology and energy. This conference will provide platform to discuss recent technical advancements and innovation in relation to materials technology and energy including materials engineering; corrosion engineering; welding technology; inspection technique; asset integrity management; upstream and downstream of (a) oil and gas (b) palm oil and (c) power generation industries. This is an excellent opportunity for the exchange of ideas and knowledge, and for discussing future challenges.

WHO SHOULD ATTEND ?

Academics, engineers, entrepreneurs, and other interested persons are invited to attend the conference.

CULTURAL AND NETWORKING TOUR

One-day trip to Niah National Park. Known for the site where a 40,000 year old human remains were discovered, Niah National Park offers jungle walk, Iban longhouse and cave experiences. Niah National Park provides some interesting and impressive sights. The area was a major centre of human settlement as early as 40,000 years ago, and features one of the world's largest cave entrances, Palaeolithic and Neolithic burial sites and iron-age cave paintings.
