SYNOPSIS

This course will enable participants to get a more systematic understanding of vertical transportation system (VTS) from design, build and manage perspective. The importance of looking at VTS from holistic angle begins with an understanding of the legislative requirements in Malaysia. This will be followed by an overview of the various types of elevators and escalators. The concept of Traffic Analysis will be explained as well as its relevance in particular building segments. The key considerations in planning and design will be expanded on. Next will be the challenges of VTS installation, testing and commissioning works. In the final segment the importance of proper service and maintenance will be addressed as well as the legal obligations of Owners of VTS.

COURSE OBJECTIVE

The objective of this course is to give participants holistic understanding of the vertical transportation system (VTS):

- * legislative, standards and code requirements.
- * various components and functions of elevator and escalator systems.
- * importance of traffic analysis in certain building segments.
- * selecting and specifying VTS.
- * appreciating challenges of installation, testing and commissioning.
- * designing system for maintainability.
- * monitoring, servicing and maintenance

WHO SHOULD ATTEND?

- * Building owners
- * Building managers
- * Project Managers
- * Designers, Engineers, Architects
- * Constructors of buildings which require VTS
- * Enthusiasts who would like to know more about the mysterious VTS
