#### SYNOPSIS

Infrastructure is an important element in large scale oil palm plantations. It facilitates the evacuation and mainline transportation of oil palm fruits from infield to the mill. Infrastructure in oil palm plantations consist of housing/buildings, gravel roads, water management, field structures, etc. However, the owner often overlooked the importance of providing good and proper infrastructure, as more attention and resources were allocated for oil palm tree planting and palm oil milling. This presentation shares the general view of the aspect of infrastructure in oil palm plantations in our country and abroad. It also highlights the important of well-planned infrastructure to overcome constraints in evacuation and mainline transportation of oil palm fruits
