SYNOPSIS

How we collaborate and work has changed over the years, driven mostly by advances in technology and communication. Yet, the primary means of communication in most engineering offices have not caught up. Many are still based on email, a technology from 1986.

In this workshop, the speakers will show how Cloud Technology can help engineering offices improve quality of work, reduce cost and maintain security at affordable prices. The speakers will use features from Office 365 and Dropbox Business to illustrate how to improve workflow, team collaboration, task monitoring and communication.
