**BACKGROUND**

Founded in 2004, Cytron provides series of reliable off-the-shelf development boards, electronic modules, mechanical parts, tools and accessories to assist makers, inventors and engineers in experimenting with their ideas especially in building robots. All you need to focus on are the advanced functions of your ideas, without worrying about any trivial details!

If you are a fans of “Transformers”, you will probably have notice that the name Cytron resembles the home planet of the Transformers, “Cybertron”. Yes, the name was inspired from that. Cytron love robots and that’s the reason the founding team got together. We got together building robots to participate in ROBOCON Malaysia and eventually won the national level, which led us to form Cytron in 2004. Cytron started off with their first product, SK40A, a PIC microcontroller starter kit which enables user to easily create their own robotic & electronic projects.

Since then, Cytron have grown from a team of 5 working from rented house to a team of 35, with their own Surface Mount Technology (SMT) line in a large Factory. With motto, Robot.Head to Toe, Cytron are now proud to have designed and produced over 100+ products ranging from Motor Drivers, Robot Controllers, Sensors, various kind of Shields and HATS.
