(All the necessary software will be provided during the class)

SYNOPSIS

Raspberry Pi, a low cost single board computer, introduced by the Raspberry Pi Foundation in United Kingdom sold 19 million units by March 2018. It had a wide range of applications ranging from home automation to taking pictures from space and it is love by both hobbyist as well as industry players.

In these digital class, we will learn how to use the raspbian operating system, working with Raspberry Pi General Purpose Input Output (GPIO) and finally to use the knowledge that you learned to build a real life project.
