## SYNOPSIS

We understand that the BIM have been adopted through the world. It has been a hot topic to many countries. In our Malaysia, according to the Construction Industry Development Board (CIDB) on Nov 2016 said Construction industry players will be required to use the Building Information Modelling (BIM) system on government projects worth over RM100mil by 2020.

As a result, recent years, BIM is getting more and more popular in AEC industry. Professionals include Architects, Consultants and Engineers gradually aware and understand the value and importance of BIM and seriously consider to implement BIM within their organizations. However, many organizations still find that there are obstacles and challenges to adopt BIM which cause them hesitation to move forward. There are many issues arise due to some challenges.

These challenges include:

- Different software for different (Sketch, Design & Construction) stages
- Different software formats resulted as non-compatibility and non-continuity
- Relatively long learning curve for many BIM software(s)
- High investment cost on BIM software(s) and hardware(s)

Now, BricsCAD is a product from an European company located in Belgium who is specialized in CAD platform. It has been started since 2002. With initial startup with IntellCAD platform and later it started with it own CAD platform which bring it to another level of CAD technology. And now it comes with BIM technology. Today, BricsCAD is the first all-in-one design solution in .dwg format. Start everything from a design brief and add details simply to develop a full-featured Building Information Model (BIM). BricsCAD BIM lifts your creativity but not complexity.

This COURSE will include:

- Brief introduction to BIM.
- How BricsCAD BIM can help especially on new user of BIM.
- The advantage of BricsCAD BIM in DWG environment.
- General introduction and live demonstration of BricsCAD BIM
- General introduction and live demonstration of Bricsys 24/7 (Cloud based Project Collaboration Platform)

## BENEFITS

- ❖ Another way of getting started on BIM platform from DWG format.
- ❖ Low entry cost on BIM platform.
- ❖ Short learning curve.
