SYNOPSIS

Building Information Modeling (BIM) had, recently, gain a lot of popularity and traction in the construction industry especially with the adoption of BIM e-submission to the local authorities in the near future. BIM involves the creating and management of information throughout the entire project life cycle. This workshop will concentrate only on the software portion of the BIM process.

In this workshop, the trainer will go through the process of creating BIM model using BricsCAD BIM. BricsCAD BIM used and stored file in native dwg format instead of other proprietary format and as such making it a familiar platform similar to traditional 2d drafting which translated to gentle learning curve. The workshop will also demonstrate how the BIM software could interact with other engineering calculation software such as Tekla in the process.

BricsCAD Shape, a free software, for creating 3D objects will also be introduced.

This COURSE will include:

- Brief introduction to BricsCAD BIM and Shape.
- Working with BricsCAD environment.
- Create BIM model.
- Interact with other BIM compliance software like Tekla, Scia Engineers etc
- BricsCAD to other CAD applications.

BENEFITS

- ❖ Another way of getting started on BIM platform from DWG format.
- ❖ Low entry cost on BIM platform.
- ❖ Short learning curve.

Cancellation Policy

IEM reserves the right to postpone, reschedule, allocate or cancel the course. Full refund less 30% if cancellation is received in writing more than 7 days before start date of the event. No cancellation will be accepted prior to the date of the event. However, replacement or substitute may be made at any time with prior notification and substitute will be charged according to membership status
