### BACKGROUND

Honeywell ([www.honeywell.com](http://www.honeywell.com)) is a Fortune 100 software-industrial company that delivers industry specific solutions that include aerospace and automotive products and services; control technologies for buildings, homes, and industry; and performance materials globally. Our technologies help everything from aircraft, cars, homes and buildings, manufacturing plants, supply chains, and workers become more connected to make our world smarter, safer, and more sustainable. Our Malaysia operations started in 1985 and today we employ over 1,500 employees in seven locations including three manufacturing sites. Our technologies and solutions, such as integrated avionics systems for aircrafts, process controls and technologies for refineries, and building automation have been supporting Malaysia in its development of a smarter, safer and more sustainable society.

Beyond business, Honeywell Hometown Solutions is an award-winning organization that focuses on areas of vital importance to communities we serve. Together with leading public and non-profit institutions, Honeywell has developed powerful programs; and in Malaysia, this includes programs that help promote and increase awareness on the importance of Science, Technology, Engineering and Maths (STEM) as well as the exciting career opportunities it creates. From 2010 to date, Honeywell has inspired more than 5000 students and teachers nationwide through various STEM initiatives and programs – including Honeywell's Leadership Challenge Academy (HLCA), Honeywell Institute for Science and Engineering (HISE) as well as Honeywell Educators for Space Academy (HESA). On top of that, Honeywell's commitment to the promotion of family safety and security saw the launch of the 'Safe Kids at Home' program, an educational safety program designed to help prevent fires, burns and scalds among young children in Malaysia. Since the launch, the program has reached out to 6000 students in Kuala Lumpur, Malaysia.
