

Report on Engineering Awareness Activity with Sekolah Menengah Kebangsaan Bukit Tinggi Klang

by Ir. Sukhairul Nizam bin Abdul Razak

Ir. Sukhairul Nizam bin Abdul Razak is currently a committee member in the Engineering Education Technical Division (E2TD).

Engineering career talk to Sekolah Menengah Kebangsaan Bukit Tinggi Klang.

On 12th October 2018, program or activity engineering was held at “Tapak Perhimpunan” of Sekolah Menengah Kebangsaan Bukit Tinggi Klang. The program involves participants from Sekolah Menengah Kebangsaan Bukit Tinggi Klang students about 40 students from form 3 after completing their PT3 examination and 2 with teachers. The Institution of Engineers, Malaysia has received approval from the Ministry of Education to organize activities with schools across the country for year 2018. The objective of this program is to foster interest and awareness among students, especially high school for science, technology, engineering and mathematics (STEM). Therefore, this program was created to bring back the professional involved in STEM way to the school to provide exposure to STEM, the importance of

STEM in everyday life and how STEM can bring success in their lives. Through this exposure, the students can cultivate enthusiasm and interest in STEM and finally more students join engineering courses in university to be an engineer.

The speakers involved in this program is Ir Sukhairul Nizam bin Abdul Razak (Committee Technical Education Engineering Division IEM). Ir Sukhairul has revealed the development of technology revolution in the early days of Islam until today, citing his experience in the automotive industry from the beginning of his work until now.
