SYNOPSIS

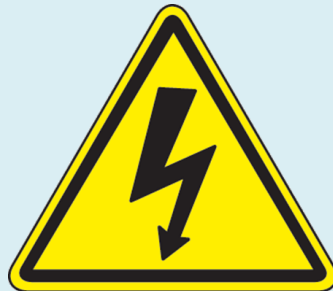

Electrical safety at home is an important consideration, the lack of knowledge can cause injury or worst, death. Prevention is better than cure, globally there are people who were electrocuted in their own homes and sometimes lost it due to fire caused by short circuits. Basic knowledge or simple action can prevent disaster from happening. Electrical safety related issues constantly evolving and must not be overlooked. The Energy Commission of Malaysia is comprised of three main roles and functions namely Economic Regulation, Technical Regulation, and Safety Regulation. These regulations were enforced to ensure security, reliability and quality in electricity.

The content of the seminar:

1. Case studies on of electrical accidents.
2. 4 Zones of current – Magnitude/ Time Duration.
3. Effects of current on human beings and livestock (IEC60479-1).
4. Electrical installation regulatory requirements and standard compliance.
5. Prevention of electric shock.
6. Q & A

This discussion will provide a simple and practical guide to promote safety at homes.
