SYNOPSIS

The Regasification Terminal Pengerang (RGTP) is under the purview of Petronas Gas Berhad (PGB), a public-listed company on Bursa Malaysia. PGB operates and maintains the offshore Regasification Terminal in Sungai Udang, Melaka (RGTSU) and the onshore Regasification Terminal in Pengerang, Johor (RGTP).

RGTP provides primary gas supply to RAPID, Pengerang Co-Generation Plant (PCP) and the Peninsular Gas Utilization (PGU) pipeline grid to augment the availability of gas in the country. RGTP offers Liquefied Natural Gas (LNG) unloading and reloading, storage, handling and regasification.

The plant has a capacity of 3.5 mtpa (million-tonnes per annum) and began its commercial operation in 2017. The plant receives LNG vessels carrying LNG imported from around the world, store it in storage tanks and convert the LNG into gas, before injecting it into the PGU pipeline grid for distribution to customers.
