Synopsis

Power BI is a suite of business analytics tools to analyze data and share insights. We can monitor our business and get answers quickly with rich dashboards available on every device. With Power BI on the web, we can monitor important data from across our organization and from all of the apps we rely on. Power BI Desktop provides us tools to transform, analyze and visualize data. Hence, we able to share reports in seconds with your organization using Power BI on the web.

This workshop introduces Microsoft Power BI for Self-Service BI and Analytics, with a strategic overview, assessment, and kick-start proof of concept. After the workshop, attendees will understand the value of Power BI, as well as patterns and techniques that help drive optimization and adoption, and ultimately provide insights for faster, better decision making.

Who can benefit?

- Business Intelligence, Data Professionals or Business Users who are looking for expertise their Power BI skills
- Heavy Excel users who are looking for level up their capabilities with Power BI

Workshop Content

- Intro to Business Intelligence
- Self Service Business Intelligence
- Ingest data from different sources and profiling
- Calculated Columns
- Composite models and aggregations
- Data visualizations using Power BI
- Power BI Mobile App
