SYNOPSIS

The Limited Liability Partnership Bill 2011 has been passed by Dewan Negara on 22 December 2011 and is expected to be fully implemented by June 2012. The introduction of limited liability partnership is intended to provide more choices for businessmen and entrepreneurs in structuring and carrying out their business operations to be more competitive.

The proposed limited liability partnership is a hybrid between a company and partnership that accords the limited liability status to its partners in addition to retaining the characteristics of conventional partnerships that allows flexibility of operations.

This combination is formulated to fulfil the needs of small businesses or start-ups, venture capital and professionals. The proposed Bill will provide simple procedures for formation and registration, maintenance and dissolutions. As a result, the administrative and compliance costs are also expected to be low compared to that of a company. Such advantages will provide a catalyst for business growth in Malaysia and will make this country a dynamic business hub.
