

WEBINAR

Technical Talk on:

“Transport in a Post-COVID 19 World - The pandemic could transform the way we travel for better or worse”

Highway & Transportation Engineering Technical Division (HTETD)

Synopsis:

The Coronavirus pandemic has had a significant impact on Malaysian public transport and more people started showing a tendency toward cars. There are two scenarios, do nothing and this will lead to more people driving to their work. Or, we can seize this opportunity to improve public transport to make it safe, resilient and more reliable as well as boost the infrastructure for active transport mode, walking and cycling. In this talk, the speaker will share with the audience about the strategy moving forward with recommended measurements for the transport hub to adopt in order to reduce the rate of coronavirus transmission.

Dr. Rosli Azad Khan

- Formerly vice president of the Chartered Institute of Logistics & Transport (FCILT) for three terms (2013 – 2018).
