

Webinar Talk in collaboration with IGTC

GREEN ENGINEERING OPPORTUNITY IN POST PANDEMIC ERA

Pandemic COVID-19 possess various challenges to human activity, from health aspect, to business, environmental, politic, safety & security. Economic slowdown is the biggest challenge by most of the countries in the world now. Trade war & oil price slump are like poring salt to the wounds for country and world economy. Many world economy experts suggested that environmental aspect must be included in any of post pandemic economic recovery plans. Therefore, it give a boost and opportunity for green engineering.

The objective of the webinar is to provide awareness & share information about post pandemic scenario for environmental requirements, opportunities & way forward for engineering & built environment.
