

VIRTUAL Talk via ZOOM Platform on

“Addressing Issues with Risk Engineers”

Wednesday | 05 August 2020

3.00 p.m. – 5.00 p.m.

Building Services Technical Division (BSTD)

SYNOPSIS

One of the basic principle of insurance is that contributions from the many to a pool to pay for the losses (in this talk specifically on FIRE losses) of the few unfortunates hence gives rise to the insurance industries. The manufacturing/service industries objective is to produce goods for the public and often require financial support from the financial industries by way of a loan. All the three parties work towards their **own self-interest** in order to be profitable.

Insurance industry employs Risk Engineers and one of the main objectives is to gather underwriting information. They can be generally categorized as follows:

- Surveyor merely to gather information in accordance to a standard format
- Risk surveyor to provide standard recommendations to mitigate losses from fire and explosion
- Risk Engineer who is a specialist and would go into depth the concepts and standards related to the specific industry.

This talk will be on Risk Engineer, what you can learn from them AND how to address the issues listed in their report.

SPEAKER

Ir. Gary Lim Eng Hwa

BE(Mech.) NZ, Mgt Dip. FIEM, P.Eng, Asean Eng.,

AT31000 (Approved ISO31000 Risk Management Lead Trainer)
