

Webinar on

WOMEN ENGINEERS

ADVANCING ENGINEERING AND SUSTAINABLE DEVELOPMENT – A WAY FORWARD FOR SUSTAINABLE WORLD

25 AUGUST 2020 | TUESDAY | 10.00AM - 12.00PM

SYNOPSIS

Engineers today are increasingly on demand to produce and deliver sustainable designs, products, infrastructure, and services. This begs the obvious questions: What is meant by sustainability and sustainable development, and what is the role of the engineer in this domain which increasingly pervades all facets of human endeavor: social, economy, and environment? This webinar aims to provide a better understanding on the importance of the strategic coupling approach of engineers + vast engineering domains with the elements of sustainability. The underlying principles of Sustainable Development Goals (SDGs) would be highlighted in this webinar as the core elements to integrate and advance the role of engineering that should transcend beyond ordinary solution providers but rather a responsible agent of change to make this world safer, resilient, and ultimately be sustainable to meet the needs of the present and future generations.

SPEAKER'S PROFILE

Sumiani Yusoff, Professor Dr., joined the Faculty of Engineering, UM in September 1990, specializing in Environmental **Engineering** and Management. obtained her PhD in Environmental Engineering and Management from UM, MSc in Public Health and Environmental Control Engineering from University of Strathclyde, Glasgow, Scotland, United Kingdom and Bachelor of Civil Engineering (Hons) from Universiti Teknologi Malaysia (UTM). Currently, she leads the Institute of Ocean & Earth Sciences (IOES) as director while helming another mandate Chairperson of UM Sustainability & Living Labs Secretariat (UMSLLS).

CPD/PDP Hours: 2 Ref No : IEM20/HQ/133/T (w)

Registration Fees

(effective 1st August 2020)

IEM Members : RM 15.00 Non - Members : RM 70.00
