# SYNOPSIS

This forum is an extension of the previous webinar conducted by the facilitator on the same topic with the exception that the format is structured towards a forum to enable interaction and participation between participants and the facilitator. In the previous webinar, a multitude of questions were posed by the participants but were not thoroughly discussed or addressed in detail. Hence, a forum is now provided to actively engage with participants online to address concerns and issues on the subject matter for discussion to a possible solution.

It is anticipated that the forum will start with a brief recap on the Project Management modes presented in a previous webinar, followed by opening the virtual Zoom floor to questions and comments from the participants.

This forum will explore the different optimum PM systems that can be applied to both the Owner and the Contractor organization across a variety of procurement approaches by the Owner in executing projects that typically involve design/engineering, procurement, fabrication/construction/installation, testing and finally commissioning. Some of the common procurement types such as Design and Build or EPCC, separate Design and Build contracts and other types such as multiple construction packaging and Construction Management (as opposed to Management Contracting) will be discussed as well.

This Zoom forum can only accommodate up to 97 participants and hence we ask that only serious attendees and participants register for the event.

# SPEAKER'S BIODATA

Ir. Faizal A. Sanusi has served the Project Management Technical Division in IEM since 2005, including as its Chairman in 2012.

He has a BSc in Civil Engineering from the George Washington University, USA in 1988 and an MBA from Open University, Malaysia in 2005.

His engineering and project management experience spans across the oil & gas and building industry since he began his career 30 years ago. In his career, he has performed various roles ranging from design engineer, resident engineer, project engineer, project manager and project advisor for a myriad of engineering projects – civil Infrastructure works, commercial buildings including an intelligent office institutional building, gas processing plants, offshore gas pipeline installations and offshore gas producing platforms. He also challenged himself as an entrepreneur in the business of facilities management for oil and gas on-shore installations and has provided trainings in various project management topics to the Royal Malaysian Navy and private commercial property developers.

Some of his notable career highlights as follows:

1. Project Advisor and Project Services Manager for Oil & Gas Exploration & Production MNCs
2. Project Services Division Head for a local Offshore Oil & Gas Service Provider
3. Project Manager for the Malaysian Securities Commission 4 star intelligent building project
4. Director of a local Facilities Management company overseeing Oil & Gas O&M projects

While he is currently the Principal Consultant of Centaur Project Controls Sdn. (a Project Management consulting firm), he mainly indulges his time in creating project management microapps to aid him in his profession.
