

WEBINAR TALK

“Managing Safety in Oil & Gas Industry: Are rules and procedures adequate?”

CPD Hours : 2 CPD Ref No : IEM20/HQ/286/T(w)

Oil, Gas and Mining Technical Division

In view of the hazards and risks associated with production and, transportation of hydrocarbon, companies in the oil and gas industry have always given the pledge to have business top priority to the subject of safety. People may get injured or killed, and environment may be damaged. It is evident from the history that, if the hazards and risks are not managed properly, catastrophic disaster could happen, as in the case of Piper Alpha, Bhopal, or to the recent one at Macondo.

Managing safety has always remained a top challenge though. With the cost pressure and business sustenance, the pledge of maintaining a safe working environment as the top business priority will be tested. This talk will look into past major incidents lesson learnt, and provide another lens of viewing safety management from organization behavior and culture perspective for business sustenance.

SPEAKER

Ir. Lee Chang Quan

A committee member of the Oil, Gas and Mining Technical Division of IEM, Ir. Lee Chang Quan started his career as a mechanical engineer. His experience in the oil and gas industry include engineering, procurement, installation and construction activities in plant modification and rejuvenation projects. Later, he moved on to undertake operational excellence and improvement roles at business level, including leading roles in steering safety and health excellence. He is currently looking after asset integrity management. He is a trained internal auditor, and incident investigator using Tripod-Beta.

He has a Master Degree in Business Administration from University of Nottingham. He is a certified Project Management Professional (PMP®) and a Certified Solutions Focused Coach (CSFC).

Saturday : 9 January 2021 : 9AM – 11AM
