## Synopsis

Malaysia is moving forward to explore the application of fire engineering as a professional field in our country. The understanding of a fire engineering application framework shall be delivered to the professionals to understand the deliverables, checker requirements, authority submission process, and fire audit inspection systems. The application of fire engineering is a complicated exercise that involves public safety. Hence, the qualified, competent, and experienced professional adopting fire engineering works shall be responsible and accountable for any deviations from the building code requirements to ensure in creating safe fire environment in our home country, Malaysia.

## Speaker's Profile

Mr. Alan Chan Teck Wai has been involved in fire engineering design for the past eleven years for building industry & railway transit of fire safety design for the past seven years. He has a Master's degree qualification in fire engineering graduated from the University of Maryland (U.S.A).
