"IEM reserves the right to alter or cancel the programme due to unforeseen circumstances at its discretion". For intending participants who choose to 'walk in without prior registration', IEM SHALL NOT be responsible for any direct or consequential losses".

## **SYNOPSIS**

One of the primary criteria for project success is the completion of the project within the sanctioned project completion date. To achieve this, a structured methodology is necessary to manage the schedule comprising the planning and controlling of the schedule. Project Schedule Management is a Project Management discipline that is deeply integrated with other facets of the project such as Project Cost Management, Project Financing and Risk Management.

Short exercises covering key concepts will be carried out to ensure that participants obtain the benefits of the course. The course is fashioned to be pragmatic and applicable to projects in any industry. Project Schedule Management is a strategic tool for large magnitude and complex projects and hence this course would be extremely relevant for project stakeholders who have KPIs of cost and time which are highly constrained in this economic environment.

# **SPEAKER'S PROFILE**

**Ir. Faizal A. Sanusi** has served the Project Management Technical Division in IEM since 2005, including as its Chairman in 2012. He has a bachelor's degree in Civil Engineering from the George Washington University, USA in 1988, and an MBA from Open University, Malaysia in 2005. His engineering and project management experiences span across the oil & gas and building industry since his began his career 30 years ago. In his career he has performed various role ranging from design engineer, resident engineer, project engineer and project

Some of his notable career highlights as follows:

- Project Advisor and Project Service Manager for Oil & Gas Exploration & Production of MNCs
- Project Services Division Head for a local offshore Oil & Gas Service Provider
- Project Manager for the Malaysian Securities Commission 4 star intelligent building project
- Director of a local facilities management company overseeing oil & Gas O&M project
