

WEBINAR

TALK ON CYCLING IN THE NETHERLAND

Synopsis:

Cycling is **the ideal way for moving through cities**. It helps climate and air quality. It brings social and economic benefits by improving public health and contributing to job creation. The Netherlands is often seen as an ideal living lab because cycling has retained its significant share of mobility throughout the country. In this talk, the speaker will share with the audience his knowledge of the state-of-the-art that emerges from research and practice on the Dutch cycling system. **Together we can make Kuala Lumpur a cycling city!**

George Liu (*Social and Behavioral Sciences*)

George is a PhD candidate at the in the Urban Cycling institute at the University of Amsterdam, researching the experience of cycling and exploring how ideas from urban design can guide the creation of healthy and attractive environments that encourage cycling as a practical and delightful mode of daily transport. His previous research at the University of Toronto includes a study of cycling patterns in the suburban communities. He is cross-appointed at the Eindhoven University of Technology.
