Ir. GARY LIM ENG HWA

BE(Mech.) NZ, Mgt Dip. FIEM, P.Eng, Asean Eng.

Ir. Gary Lim is an experienced and qualified Professional Engineer with over 20 years of manufacturing experience in these areas; Industrial Engineering (Work Study), Project Management, Maintenance, Production and Factory Management. The 20 years of his work spanned over various industries namely industrial chemicals, dairy products, jam, sauces, chocolates, confectionnaires, industrial gases (liquid nitrogen, oxygen, argon, etc), blow moulding of plastic containers and paint manufacturing.

His last 11 years of his working experience was with a multinational insurance company where he received further training in the area of Fire Engineering from an insurer perspective, started as the Risk Engineer and retired as the Risk Manager of the MNC insurer. Currently he is the committee member of the Building Services Technical Division and member of the Fire Advisory Board of the Institution of Engineers, Malaysia. He has a degree in Mechanical Engineering from the University of Canterbury, New Zealand and a Management Diploma from New Zealand. He is a Professional Engineer registered with the Board of Engineers, Malaysia and a Fellow of the Institution of Engineers, Malaysia (IEM). He spoke in many public seminars both for the insurance industry, Malaysia Fire Protection Association and the Institution of Engineers, Malaysia.

SYNOPSIS

In any manufacturing companies there will be a number of emergency situations which could arise during the operation. Often such emergency happens when you least expect it in this respect being PREPARED for such situation is very important to mitigate the loss to life and property. There are statutory regulations which impose upon manufacturer to put in place a very specific emergency like for example:

- Manufacturer is categorised as a DESIGNATED building under the Fire Services Act 1988 - Fire Services (Fire Certificate) Regulation 2001 an Emergency Response Team must be formalized.
- Manufacturer under Occupational Safety and Health (Control of Industrial Major Accident Hazards) Regulation 1996 requires On-Site Emergency Plan hence various Emergency Response Team must be formalized.

From this course manufacturer would understand their strength and weakness when face with an emergency situation. Therefore, a review of the existing Emergency Response Teams would be deliberated and suggestions provided to enhance their respective teams.
