

WEBINAR TALK ON “HEALTHCARE DISASTER MANAGEMENT: ARE WE READY?”

11 October 2021 (Monday)
5.00 p.m. – 7.00 p.m.
via ZOOM Platform

SYNOPSIS

Healthcare management is experiencing a war on Covid-19 pandemic now. It is an unprecedented disaster where the whole world is being challenged how to effectively deal with the situation. In the talk, the speaker shall not only explain on the biological disaster management for hospital but all other potential disasters that hospital management need to be prepared for.

As a summary, healthcare disaster management can be classified into the followings :

- External Disaster Plan (also classified as Community Affected – Healthcare Facility Unaffected): during such scenarios, the Healthcare Facility plays a vital role in the disaster response being undertaken. For the Healthcare Facility, such scenarios would imply a sudden increase in demand for patient care services because of the surge in the number of patients seeking medical attention. There is a possibility of the Healthcare Facility getting overwhelmed if adequate preparedness and response mechanisms are not swung into action as soon as the disaster is reported.
- Internal Disaster Plans (also classified as Community Unaffected – Healthcare Facility Affected): Such scenarios arise from the internal disasters within the Healthcare Facility. As such, partial or complete evacuation and transfer of critical patients to networking facilities is the key to successful response. Such scenarios also demand a high degree of preparedness on the side of the Facility administration and staff, as well as a speedy response from the surrounding community and Healthcare Facilities. The speaker than shall touch on Business Recovery Plan for both internal and external disasters, business recovery plan shall be available for the facility to normalcy after the event.

Our SPEAKER

Ir. AL-KHAIRI MOHD DAUD

P.Eng, PEM, C Eng, CPSI, MIEM, MMEPA, MMSQH, REEM
