## SYNOPSIS

Personal Protective Equipment (PPE) is clothing or equipment designed to reduce employee exposure to chemical, biological, and physical hazards when on a worksite. It is used to protect employees when engineering and administrative controls are not feasible to reduce the risks to acceptable levels. There are 7 types of PPE that require the approval from Director General of DOSH which includes respiratory, hearing, eyes, hands, foot, body and head protection. The requirements for PPE approval are stipulated in Factory and Machinery Act 1967, Occupational Safety and Health Act 1994. The scope of DOSH approval is applicable for all PPE products using in the workplaces, including both imported and locally made PPE products. The course will provide guidance for participants to understand the date of DOSH SIRIM certification being enforce, what they need to know about their current PPE inventory and the next purchasing of PPE product to be used in Malaysia, the list of approved PPE, how to get product certification from SIRIM QAS International Sdn. Bhd., correct type of PPE Selection and more. This course will also cover on PPEs to prevent unnecessary injury in the workplace, protect employees from excessive chemical exposure, prevent the spread of germs and infectious diseases including COVID-19, help businesses comply with regulatory requirements; and improve employee productivity and efficiency by using proper type of PPEs.
