SYNOPSIS

Electricity has been identified as one of the common cause of fires in buildings. A total of 1239 cases of fires have been reported in year 2020 caused by electrical installation in Malaysia. Electrical fires can cause huge losses in the commercial buildings as well as human life. Electrical fire risk can be reduced with proper electrical design following the relevant regulations and standards. This webinar will share some tips on how to mitigate risk of fire due to electrical installation by implementing proper electrical design in the buildings.

SPEAKERS' PROFILE

Ir. Chong Chew Fan graduated with B.Eng. (Hons) in Electrical, Electronics and System Engineering from Universiti Kebangsaan Malaysia. He is a Professional Engineer with Practicing Certificate registered with Board of Engineers Malaysia (BEM) and a Registered Electrical Energy Manager (REEM) with Energy Commission Malaysia. He has more than 19 years of working experience covering design, contract administration, project management and consultancy in electrical and instrumentation services. He is also an active member in various technical committees and working group in standards and guidelines development.
