THEME

Bridging the Government, Industry and Academia Towards Developing Indigenous Marine Technology

SYNOPSIS

To synergise the SBSR industry for better market positioning, locally and abroad towards global competitiveness by gathering all the experts and interested parties to be in Malaysia Marine Conference 2022 with the theme using as much as possible local product (indigenous)

OBJECTIVES

- > To bring together all industry players either shipyard and/or marine contractors under one umbrella of discussion for business-to-business opportunity.
- > To understand the current policy, or if not an opportunity for marine industry issues and challenges to be registered or hear for necessary mitigation plan.
- > To enhance the usage of local product in marine industry, supported by related Government agencies
- > To bridge any gap between government agencies, academia and industry players in order to be a sound SBSR eco-system.

OUTCOMES

- > Expected around 100 local marines related companies and Shipyard to participate
- > If matters pertaining to policy, a resolution will be released and submitted for consideration to policy maker
- > As a marketing venue and business networking in SBSR particularly to new comer in the industry
- > Enhance the usage of local product, encouraging the development and production of local system for SBSR
- > Academia to tailor research and development, fulfilling current industry need and requirement
