- 3.00pm Session starts
- 4.00pm Q&A Session
- 4.30pm Networking / Hi-tea
- 5.00pm Adjourn

FREE TO JOIN

SYNOPSIS

The Registration of Engineers Act 1967 (REA) is an Act of Parliament enacted to provide for the registration of engineers, and sole proprietorships, partnerships and bodies corporate providing professional engineering services. Under the REA, only registered Persons and registered Engineering Consultancy Practices (ECPs) are entitled to provide professional engineering services or to assist the Professional Engineer in the supervision of engineering works. The Registration of Engineers Regulations 1990 (RER) is a subsidiary legislation prescribed by the Board of Engineers Malaysia (the Board) to enable it to perform its functions or to exercise any of its powers set out under the REA. The RER prescribes the Code of Conduct expected of a registered Person.

This MOGEC talk will look at the provisions of the REA and the RER, including the different categories of registration, the entitlements for each category of registration, the enabling requirements for registration as a registered person or a registered ECP, and the penalties for any infringement of the REA. A registered person or registered ECP who contravenes the REA can be subjected to disciplinary action while a non-registered person or business can be subjected, on conviction, to a fine or to imprisonment.

This talk will look at some common pitfalls and answer some of the frequently asked questions such as :

“Why did Parliament enact the REA?”

“Is there any connection between the REA and other Acts of Parliament?”

“What is the difference between the REA and the RER?”

“Must I register with the Board of Engineers Malaysia?”

“Must my company register with the Board of Engineers Malaysia?”

“What are my entitlements as a registered Person?”

“What are my obligations as a registered Person?”

“What is an Engineering Consultancy Practice (ECP).”

“Is the Scale of Fees mandatory?”

“What to look out for when you engage an engineering Consultant”

“Does the REA cover EPCC projects?”

..... and lots more
