# SYNOPSIS

With current economy situation worldwide caused by COVID-19, businesses big and small are facing tremendous challenges for survival. Explore and adoption of new ways of operating our businesses is necessity.

This talk will share with audience our experience and technologies needed to switch from old ways of using our business tools and infrastructure to more advanced and much less expensive one to invest and operate for immediate, short and long term survival of any business worldwide including Malaysia.

Adoption of telecommunication platform based on Asterisk (open-source IPPBX system) has tremendous success over past couple of decades has proven that open-source solution is viable.

Today it is possible to apply a full open-source application suite in multi-location office, multi-payment system, and remove software purchasing cost and yearly license renewal.

This talk will share the user experience in adoption of current development & deployment of an Advance Cashiering System for businesses.

This talk will be divided into 2 sections:

1. Total Enterprise Advance Cashiering System Platform
2. Opportunities to address and overhaul all aspects of business tools like telecommunication, IT deployment in office environment and typical platforms that business should be addressing with a complete and total office business solution using affordable technologies.

Other related open-source solutions mentioned will be:

- Desktop, Mobile and Server Apps OA Productivity Tools
- Infrastructure Management Tools
- Office Management Tools
- Enterprise security platform
- Online training, meeting, and collaboration platforms
- Total telecommunication needs of a corporation
