OVERVIEW:

Project management is a skill which applies to any industry, organization or project. This course provides fundamental knowledge on project management in particular the major project constraints that affect the successful completion of project objectives. Selected topics on project scope management, project scheduling management, project risk management and project cost management will be discussed in relevant to the planning stage. The concept used in this course will refer to the standard of project management which enables the participants to speak with the common language of project management effectively. At the end of this course, participants will be able to use the best practices in project management in particular processes related to scope, schedule, risk and cost management.

OBJECTIVE:

- To understand the concept of project management, planning and constraints
- To understand the processes in scope, schedule, risk and cost management

LEARNING OUTCOME:

- Explain the main concepts and components of project constraints
- Apply the processes in the project scope, schedule, risk and cost management to planning

TARGET GROUP:

- Executives
- Managers
- Project managers
- Engineers
- Academics
- University's students

PROGRAMME CONTENT:

- Project management
- Project planning
- Project constraints
- Project scope management
- Project schedule management
- Project risk management
- Project cost management

Cancellation Policy

No cancellation will be accepted prior to the date of the event. However, replacement or substitute may be made at any time with 7 days prior notification and substitute will be charged according to membership status.
