(STRICTLY REGISTRATION AND  
PAYMENT VIA IEM ONLINE)

## ABOUT "PERODUA MANUFACTURING SDN BHD"

**PERODUA** derived its name from its official company name, Perusahaan Otomobil Kedua Sdn Bhd. A private limited company, Perodua was established in 1993 with the aim of bringing complete mobility to Malaysians through practical and high-value products and services that are delivered with the greatest of care.

Perodua portfolio comprises vehicle manufacturing, research and development, sales, after-sales, body and paint repair as well as pre-owned

vehicles. The Perodua Smart Build is designed to help Perodua and the automotive ecosystem reap the benefits of the National Automotive Policy by making the industry more competitive and progressive.

Perodua is Malaysia's first and biggest Energy-Efficient Vehicle (EEV) manufacturer, having produced and sold over a million EEVs to date.

Perodua's headquarters sits on a 522-acre site in Sungai Choh, Rawang, comprising its corporate building, two vehicle manufacturing facilities, a research and development facility with test track, a distribution stockyard, a parts centre, a training centre, an eco-garden, and a child-care centre.

Combined, its Perodua Manufacturing Sdn Bhd (PMSB) and Perodua Global Manufacturing Sdn Bhd (PGMSB) plants can produce up to 320,000 vehicles a year. Perodua directly employs approximately 11,500 people, and when combined with its suppliers and official dealers, the total is estimated at 70,000.

This visit allowed participants to learn about the best practices on safety and how a big manufacturing industry like PERODUA are built, managed and maintained.

# ITINERARY
