Synopsis:

Are you an engineer who wants to take their career to the next level? Do you feel like you are not being recognized for your skills and expertise in the workplace? Attend our talk on training engineers to get better jobs, and learn how to elevate your career prospects. Our talk will cover the latest trends in engineering careers and what it takes to stand out in a crowded job market. We will discuss the importance of continuous learning and skill development in staying competitive and advancing your career. Our expert speaker is a seasoned engineering professional with years of experience in leadership roles in various industries. They will share their insights on what employers are looking for in candidates, the most sought-after skills, and how to showcase your strengths in job applications and interviews. We will provide tips and techniques for networking effectively, both in person and online, and explain how to leverage these connections to find job opportunities and advance your career.

Our talk will also address the challenges faced by engineers in a rapidly evolving industry, such as keeping up with new technologies and changing job requirements. We will provide practical advice on how to stay up to date with the latest developments and continue learning throughout your career. Our talk is open to engineers of all levels, whether you are just starting out in your career or looking to advance to a leadership position. Investing in your career is one of the most important decisions you can make. Don't miss this opportunity to learn how to stand out in a competitive job market and achieve your career goals.

Biodata

Ir. (Dr.) S. Vignaeswaran PEPC has more than 30 years of working experience in the electrical, computer, IT, SCADA, project management and tendering field. He has been involved in state-of-the-art applications which includes cyber-security from the 1990s. He has an Electrical Engineering degree from Monash University (Clayton, Australia) and MSc in IT/BIS from University of Keele, UK. He continues to publish international papers in Engineering, IT, Computer Security and Project Management fields.

He has been Client's HOD (Electrical & Automation) in a large-scale Saudi Arabian project up to RM 8 billion in value. He is currently involved in the research of a state-of-art utility automation system that has applied new AI-based and pre-emptive approaches in its distribution automation systems.
