SYNOPSIS

In this impactful exploration, we delve into the pivotal topic of fostering women inclusivity within the workplace. Recognizing the undeniable benefits of diversity and gender equality, our topic outlines a strategic roadmap for organizations seeking to create an inclusive environment that empowers and supports the professional growth of women.

Addressing the current landscape, this topic shed light on the challenges women face in the workplace, emphasizing the urgency of targeted initiatives. Drawing inspiration from successful organizations, we showcase best practices and success stories, illustrating the tangible benefits of embracing women inclusivity.

By underlining the significance of education and awareness programs, we emphasize the organization's role in dismantling stereotypes and biases, fostering a culture of equality within the workplace. This talk stresses the importance of visible and committed leadership in driving and sustaining inclusivity initiatives, showcasing a direct correlation between inclusive leadership and organizational success.

In conclusion, our talk issues a compelling call to action. Organizations are urged to commit to the outlined pathway, fostering workplaces that are not only equitable but also empowering for women. Join us on this transformative journey towards breaking barriers and creating workplaces where diversity is not just valued but celebrated.

ABOUT THE SPEAKER

Dr. Thulasi is a seasoned professional with a strong background in Manufacturing System Engineering, holding a Doctor of Philosophy (PhD) degree earned from Universiti Putra Malaysia (2019-2023) with an impressive CGPA of 3.75. Currently serving as a Senior Lecturer at Inti International University & College (IIU) since September 2023. Dr. Thulasi plays a pivotal role in shaping the academic landscape.

In the academic realm, Dr. Thulasi is dedicated to planning, developing, and delivering impactful learning and teaching materials within the subject area. Beyond the classroom, her commitment extends to conducting research, scholarly activities, and consultancy services, contributing significantly to the university's profile. Additionally, Dr. Thulasi undertakes management and leadership duties, showcasing a comprehensive approach to her role.

As a Senior Lecturer, Dr. Thulasi is deeply involved in guiding and supporting students in their academic and professional development, reflecting a passion for fostering the growth of the next generation of professionals.

Prior to her academic role, Dr. Thulasi garnered valuable industry experience as a Senior Manufacturing Engineer at Kendek Products Sdn. Bhd. (November 2017–August 2023). In this capacity, she demonstrated expertise in monitoring production scheduling, ensuring on-time delivery, and effectively communicating with customers. Dr. Thulasi also played a crucial role in optimizing logistics systems and processes, showcasing a proactive approach to improving overall efficiency.

With a wealth of academic and industry experience, Dr. Thulasi brings a unique blend of theoretical knowledge and practical insights to both the academic and manufacturing domains. Her career trajectory exemplifies a commitment to excellence, continuous improvement, and a passion for contributing to both education and industry advancement.
