SYNOPSIS

Leadership in Engineering: Managing Change and Driving Innovation" is a dynamic presentation aimed at empowering engineers to navigate the complexities of the modern world with visionary leadership and adaptability. The speaker of the day will be Dr. Indera Shaiful, an expert in transformation and change management, the talk will delve into effective strategies for fostering innovation, embracing technological advancements, and bridging the generational divide within the engineering community. This session promises to inspire engineers of all levels to lead change effectively, ensuring that the engineering profession remains at the forefront of solving global challenges and driving societal progress.

SPEAKER'S PROFILE

Ts. Dr. Indera Shaiful Baharudin is a distinguished Organization Transformation practitioner. With 18 years of leadership experience in high-tech companies specializing in Green Technology and Oil & Gas sectors, he is renowned for his expertise in transformation across 12 industries. Dr. Indera Shaiful has developed a proprietary sustainable diagnostic framework that has successfully led 26 multinational transformation projects.

Dr. Indera Shaiful holds a Bachelor's degree in Mechanical Engineering from Multimedia University, which he obtained in 2005. He then pursued a Master's degree in Engineering Management from Universiti Teknologi Mara (UiTM), graduating in 2012. In 2022, he furthered his academic achievements by completing his PhD in Mechanical Engineering from the same university.

Dr. Indera is a certified Culture Transformation Consultant and a certified Professional Technologist in Green Technology. With extensive senior management experience, he is known for his ability to drive efficiency, profitability, and customer satisfaction. He excels in turnarounds, startups, international business, and improving overall performance.
