

IEM

The Institution of Engineers, Malaysia

ORGANISED BY:

Urban Engineering Development Special Interest Group (UEDSIG)

Webinar Talk On

“How Technologies Contribute To Sustainability With Smart Building”

PROGRAM DETAILS

DATE : 28 SEPTEMBER, 2024 (SATURDAY)

TIME : 9.30AM - 11.30AM

BEM APPROVED CPD: 2

REF NO : IEM24/HQ/331/T (W)

SPEAKER : MR. CHRISTOPHER CHONG CHEW VUN

Christopher has over 22 years' experience in IT Infrastructure selling into major large enterprises, commercial and public sector customers in Malaysia. he has an extensive hand on experience in data center technologies on ethernet and SAN networking (standalone and software defined), compute, storage, firewall, load balancer, virtualization, operating systems (windows and open source), hyper converge systems, public and private cloud, backup technologies.

OVERVIEW:

All companies in Malaysia need to meet sustainability goals with net-zero emissions by 2050. In addition to utilizing sustainable materials, integrating renewable energy sources, and implementing green building certifications, how can technologies further accelerate all companies' sustainability goals with smart buildings that change the way we work?
