Session 1 Project Management Tool

Synopsis

This course will share the current tools and techniques in sustainable development type of projects. This is to enhance the understanding through examples of sustainable projects. This course will describe the importance of being familiar with a few terms and knowing how international sustainable development projects have been planned, designed & executed. The term 'project' refers to projects (or programs) that aim to support social, political, and/or economic change within a defined time frame. These are integrated into the strategies, policies, and programs of the partner countries, and harmonized with the contributions provided by other international agencies based on the following objectives: -

- Understand international development background,
- Identify project based on situation analysis,
- Project conceptualization through strategy design

11.45 am to 12.55 pm	Implementing project & results management
12.55 pm - 1.00 pm	Q&A & Break

Session 2 : Techniques and Consultant Competencies for SDG and ESG Project

SYNOPSIS

If you're passionate about helping the planet, discovering the answer to ‘what is a consultant job in SDG program?’ could lead you to a good career. Organizations in many industries employ consultants in the SDG program to improve their practices. Consultants are likely to be in demand as the world becomes more eco-conscious in addressing climate change through adaptation and mitigation (clean energy) programs. In this short course, we define what a sustainable consultant is, what they do, the skills they need and other information about their careers.

Continuously improve your competencies as a consultant in SDG area and to gain a better understanding of the various roles a consultant holds in the field of international arena is what we will go through this short course. Besides how to learn actively create and promote your relationship with your clients, and how to gain awareness of the potential and limitations of consulting interventions within specific intercultural contexts.

A sustainable consultant is a professional who advises clients on sustainable strategies. Sustainable consultants may have government or commercial business clients. These organizations hired consultants to become eco-friendlier and more efficient. Satisfied clients may build long-term relationships with sustainable consultants and use them regularly to become greener over time. Sustainable consultants are sometimes called sustainability consultants and environmental consultants.

Consultancy is a demand oriented, organized assistance in decision-making processes. The assistance of consultant is aimed at extending the knowledge and action competence of the client/partner
