SYNOPSIS

Today business in the engineering sector is picking up in response to the Malaysian ETP (Economic Transformation Program). Of the 12 NKRA (National Key Resource Areas), almost all are linked to the business domain. Should the engineers at large continue to work for someone or an organization? Or, be an entrepreneur and take the plunge as a true business champion. However, no doubt the plunge is easy to take but not without risks. The speaker an accomplished marine professional and an accredited professional engineer has seen for the most part of his career in the public sector but entered the private sector business world since 2006. Today he is chairman of 4 companies of related business segments.
