SYNOPSIS

In an AI-driven world defined by speed and complexity, engineers need more than technical expertise. Power skills—human-centred capabilities like critical thinking, communication, adaptability, collaboration, and ethical judgment—enable engineers to lead, innovate, and stay relevant.

Join us and earn valuable CPD points while gaining valuable insights from our esteemed experts. Don't miss out this opportunity to enhance your knowledge and skills in the field.

SPEAKER'S PROFILE

Major Dr. Prebagan Jayaraman (Retired) holds a PhD in Engineering Business Management from UTM and brings over three decades of hands-on leadership experience. As a former project team member of the New Generation Patrol Vessel, he witnessed how power skills drive complex project failure and success. He is a Project Management Professional (PMP) and PMI Risk Management Professional (PMI-RMP).
