SYNOPSIS

Today business in the engineering sector is picking up in many sectors. Whilst in Europe recession is setting in evidence declared by many countries including France, Spain and Italy, Malaysia is fortunate to still manage positive growth economically. Engineers are instrumental in almost all business sectors or at least in a great big percentage of the whole market share. How does the engineer measure up to the challenges of a successful business venture? Are engineers natural risk takers or are they timid, cautious and calculative personalities. The speaker an accomplished marine professional and an accredited professional engineer has seen for the most part of his career in the public sector but entered the private sector business world since 2006. Today he is chairman of 4 companies of related business segments. Dato’ First Admiral Ir Ahmad Murad a retired Naval Engineer will share fundamentals that will assist young engineers who are new in the market and entering into the business domain with a heavy heart and full of anxiety.
