

Smart & Green: AI, IoT, Automation & Low Altitude Economy (LAE) for Net Zero

Mr. Elanggovan Thanggavilo
Founder & Special Advisor | Malaysia

22 SEPT
2026

11:00am
–1230pm

Power Space 1,
Hall 1

This session explores how AI, IoT, automation, drones, UAS/ UAV technologies, and the Low Altitude Economy (LAE) are driving sustainable transformation and Net Zero ambitions. Participants will learn how intelligent systems enhance efficiency, sustainability, smart infrastructure, mobility, manufacturing, and environmental monitoring while creating new economic opportunities and future workforce demands.

BEM APPROVED CPD: 1.5
