HIKING TO BUKIT WAWASAN

Bukit Wawasan, situated in Puchong, offers a refreshing escape with its lush greenery and accessible forest trails. Unlike more strenuous peaks, this route focuses on the basic trail loop, providing a steady and rewarding hike through the Ayer Hitam Forest Reserve. The trail features a peak elevation of approximately 233m (764 ft), making it an ideal choice for those seeking a manageable yet scenic outdoor experience. As urban development continues around the forest reserve, this area remains a vital water catchment area and a sanctuary for local biodiversity. We must ensure no pollution is left behind to preserve this vital area for future generations. The path offers a well-maintained environment for city dwellers to connect with nature. **Fun Fact:** The surrounding forest is part of an ongoing effort to maintain sustainable green lungs within the city, contributing to the region's unique natural heritage.

DATE

16 September 2026, Wednesday

MEET AT THE TRAIL HEAD

7.00 am

PEAK ELEVATION

The summit sits at approximately
233m (764 ft)

DIFFICULTY

It is considered a beginner-to-moderate hike. The beginning and final 200 meters toward the peak are the steepest sections, while the middle portion is relatively flat.
