### BACKGROUND

Lynas Corporation Ltd is an Australian Stock Exchange 200 listed company. Its strategy is to create a reliable, fully integrated source of Rare Earths from mine through to market, and to become the benchmark for the security of supply and environmental standards in the global Rare Earths industry. Rare Earths are moderately abundant group of 15 metallic elements known as the Lanthanide series. These Rare Earths are playing a pivotal role in greenhouse gas reduction, are enablers of digital technology and its miniaturisation and are also supporting the uptake of energy efficient initiatives.

Lynas Advanced Materials Plant (LAMP), situated in Kuantan, Pahang is a state-of-the-art Rare Earths processing plant that process Rare Earths sourced from Mount Weld in Western Australia, the richest known deposit of Rare Earths in the world. The visit aims to enlighten participants of the properties of Rare Earths, their use and the daily operational aspects of LAMP.
