BACKGROUND

Aker Solutions is a global provider of products, systems and services to the oil and gas industry. Their engineering, design and technology bring discoveries into production and maximize recovery from each petroleum field. They employ approximately 28,000 people in about 30 countries. Aker Solutions portfolio of oilfield products, systems and services, stretches all the way from the reservoir to the wellstream processing systems generating marketable and valuable hydrocarbon products. Their target is to deliver the best.

Each product, system and service competes on a standalone basis in the market but with their broad portfolio and experience, they understand the challenges and apply the knowledge to create optimal solutions. Aker Solutions ASA is the parent company in the group, which consists of a number of separate legal entities. Aker Solutions is used as the common brand and trademark for most of these entities. In 2012 Aker Solutions had aggregated annual revenues of approximately NOK 45 billion. The company is listed on the Oslo Stock Exchange.
